CONTENTS

No. 1, JANUARY, 1947

Milton Joseph Rosenau 1
Studies on the Nutritional Requirements of *Brucella suis*. W. G. McCullough, R. C. Mills, E. J. Herbst, W. G. Roessler, and C. R. Brewer 5
Penicillin Assay Techniques: A Comparative Study. R. E. Dolkart, E. L. Dey, and G. X. Schwemlein 17
The Influence of Subculture and of Streptococcal Extracts on the Growth Rates of Hemolytic Streptococci. Thaddeus Lewandowski and Grant L. Stahly 25
Simple Medium for Maintenance of Meningococci. Max Levine and A. R. Thomas, Jr. 33
Melibiose Broth for Classifying Yeasts. C. E. Skinner and R. Bouthilet 37
The Identification of Sporeforming Bacteria Isolated from Incompletely Sterilized Agar. Nathan R. Smith 45
Electron Microscope Studies of the "Interference Phenomenon" Between Bacterial Viruses of the *Escherichia coli* Group. Martha Barnes Baylor and G. L. Clark ... 49
The Assay of Antibiotic Mixtures. F. J. Rudert, B. A. Kenner, and Milton J. Foter .. 57
The Inactivation of Influenza Virus by Certain Vapors. Thomas C. Grubb, Marie L. Miesse, and Bruno Puetzer 61
Conditions Contributing to Streptococcal Virulence. II. Intra-phasic Attenuation by Sulfanilamide. Philip Hadley and Verna Wetzel 67
Nutritional Requirements of *Bacillus alvei* and *Bacillus para-alvei*. H. Katznelson and A. G. Lochhead 83
The Cultivation of *Bacterium tularense* in Embryonated Eggs. Cora M. Downs, Lewis L. Coriell, S. S. Chapman, and Alice Klauber 89
Actinomycetin. Maurice Welsch 101
The Viability of Heat-activatable Spores in Nutrient and Nonnutrient Substrates as Influenced by Prestorage or Poststorage Heating and Other Factors. Harold R. Curran and Fred R. Evans 103
The Effect of Certain Mineral Elements on the Production of Penicillin in Shake Flasks. H. Koffler, S. G. Knight, and W. C. Frazier 115
Note:
Nutritional Requirements of *Streptococcus apis*. H. Katznelson 125
Proceedings of Local Branches of the Society of American Bacteriologists 127

No. 2, FEBRUARY, 1947

Observations Concerning the Growth and Metabolic Activities of Myxococci in a Simple Protein-free Liquid Medium. Albert E. Oxford 129
The Egg Yolk Plate Reaction for the Presumptive Diagnosis of *Clostridium sporogenes* and Certain Species of the Gangrene and Botulinum Groups. L. S. McClung and Ruth Toabe 139
Ultraviolet Irradiation of Bacteriophage During Intracellular Growth. S. E. Luria and R. Latarjet 149
The Effects of X-Rays on a Strain of *Eberthella typhosa*. Thomas H. Grainger, Jr. 165
Intracellular Bacteroids in the Cockroach (*Periplaneta americana* Linn.). H. T. Gier 173
Shigella Types Encountered in the Mediterranean Area. W. H. Ewing and J. L. Gravatti 191
Comparative Studies of Enterococci and *Escherichia coli* as Indices of Pollution. Morris Ostrolenk, Norman Kramer, and Robert C. Cleverdon 197
Studies on Some Biological Aspects of Dihydrostreptomycin. Richard Donovick and Geoffrey Rake 205

Practical Media and Control Measures for Producing Highly Toxic Cultures of *Clostridium botulinum*, Type A. Keith H. Lewis and Edwin V. Hill 213
The Relation of Natural Variation in *Penicillium notatum* to the Yield of Penicillin in Surface Culture. Alma J. Whiffen and George M. Savage 231
Studies on Penicillinase. III. The Effect of Antipenicillinase on Penicillin-resistant Organisms. Riley D. Housewright and Richard J. Henry 241
Notes:
Salmonella monschaui—A New Type. Philip R. Carlquist and Margaret S. Coates .. 249
The Production of Apparent Cycles in Bacterial Variation. Werner Braun 250
The Influence of Pretreating Bacteria with Anionic Agents on the Antibacterial Action of Cationic Germicides. Adrien S. DuBois and Diana D. Dibblee 251
Proceedings of Local Branches of the Society of American Bacteriologists 253

No. 3, MARCH, 1947

Methylcellulose and Bacterial Motility. Adrianus Pijper 257
The Effects of Bacteria on the Growth of *Trichomonas foetus* (Protozoa). Karl Richard Johansson, Banner Bill Morgan, and Charles H. Winkler, Jr. 271
Biological Studies on Capsulated Yeasts. J. Mager and M. Aschner 283
Studies on Nonfruiting Myxobacteria. I. *Cytophaga johnsonae*, n. sp., a Chitin-decomposing Myxobacterium. R. Y. Stanier 297
Comparative Distribution and Possible Pathogenicity of Paracolobactrum Species in an Area Highly Endemic for Enteric Infections. W. Blake Christensen 317
Classification of the Rickettsiae of Rocky Mountain Spotted Fever and of Endemic (Murine) Typhus. Ida A. Bengtson 325
Penicillin. X. The Effect of Phenylacetic Acid on Penicillin Production. Andrew J. Moyer and Robert D. Coghill 329
The Influence of Temperature upon Opsonization and Phagocytosis. Christine Zarafonetis, Doralea R. Harmon, and Paul F. Clark 343
Relation Between the Rate of Growth of a Mutant Strain of *Escherichia coli* and the Efficiency of Its Utilization of Arginine. J. O. Lampen and M. J. Jones 351
Micromonosporin, an Antibiotic Substance from a Little-known Group of Microorganisms. Selman A. Waksman, Walton B. Geiger, and Elizabeth Bugie 355
Notes:
Changes Induced in the Nonspecific Antigens of *Salmonella*. D. W. Bruner and P. R. Edwards 359
The Use of Fragmented Mycelial Inoculum in the Culture of Fungi. William W. Dorrell and Robert M. Page 360
The Use of a Polyvalent Antiserum for Preliminary Identification of *Salmonella* Cultures. W. H. Ewing and D. W. Bruner 362
Study of the Utilization of Some Organic Acids by *Escherichia* and *Aerobacter*. William E. Clapper and Charles F. Poe 363
The Preparation of Silicic Acid Jellies for the Cultivation of Microorganisms. Björn Ingelman and Helge Laurell 364
Advantages of Incubation at 30 C for the Study of Staphylococci. George H. Chapman 365
Proceedings of Local Branches of the Society of American Bacteriologists 367

No. 4, APRIL, 1947

Comparative Bacteriostatic Assays with Rosaniline and Its Phenolic Analog (Rosolic Acid). E. Fischer and R. Muñoz 381
On the Effect of Aeration and Nutrition on Cellulose Decomposition by Certain Bacteria. Elwyn T. Reese 389
Comparative Action of Bromine and Iodine on Toxic Enzymes of *Staphylococcus aureus* and *Streptococcus pyogenes*. H. Parkas 401
The Relationship Between *Lactobacillus acidophilus* (Moro) Holland and *Lactobacillus casei* (Orla-Jensen) Holland. Carl S. Pederson 407

The Growth of *Clostridium septicum* and Its Inhibition. Francis J. Ryan, Lillian K. Schneider, and Robert Ballentine 417
The Nutrition of Protozoa. I. A Simplified Medium for the Investigation of Unknown Factors in Blood Serum Essential for the Sustained Growth of *Trichomonas vaginalis*. Herbert Sprince and Alfred B. Kupferberg 435
The Nutrition of Protozoa. II. The Separation of Human Blood Serum into Two Fractions, Both Essential for the Sustained Growth of *Trichomonas vaginalis*. Herbert Sprince and Alfred B. Kupferberg 441
Studies on the Morphology of the Elementary Bodies of Fowl Pox. Vincent Groupé and Geoffrey Rake 449
The Effect of Metabolites of *Escherichia coli* on the Growth of Coli-Aerogenes Bacteria. J. M. Coblentz and Max Levine 455
A Mechanism for the Development of Resistance to Streptomycin and Penicillin. Morton Klein 463
Antagonism by *Aerobacter* Strains. E. Staten Wynne 469
A Rapid Method for the Staining of *Rickettsia orientalis*. Fred H. Diercks and Robert O. Tibbs 479
Observations on the *in Vivo* and *in Vitro* Development of Bacterial Resistance to Streptomycin. C. W. Price, W. A. Randall, V. L. Chandler, and R. J. Reedy 481
Studies on Hemolytic Streptococci. IX. Differentiation of Species in Streptococci of Group A. Alice C. Evans 489
Notes:
A Typhoidlike Infection with *Salmonella gatuni*. A. Curbelo, A. Clerch, R. Albecete, and T. Drake 497
A Cell Wall Stain Employing a Cationic Surface-active Agent as a Mordant. M. T. Dyar 498
A Type d Strain of *Hemophilus influenzae* Previously Designated Provisionally as Type d_2 and Type g. Margaret Pittman 499
Proceedings of Local Branches of the Society of American Bacteriologists 501

No. 5, May, 1947

Serological Studies of the Genus *Xanthomonas*. I. Cross-Agglutination Relationships. R. P. Elrod and Armin C. Braun 509
Serological Studies of the Genus *Xanthomonas*. II. *Xanthomonas translucens* Group. R. P. Elrod and Armin C. Braun 519
A Study, with the High-Voltage Electron Microscope, of the Endospore and Life Cycle of *Bacillus mycoides*. Georges Knaysi, R. F. Baker, and James Hillier 525
Demonstration, with the Electron Microscope, of a Nucleus in *Bacillus mycoides* Grown in a Nitrogen-free Medium. Georges Knaysi and Richard F. Baker 539
Inhibition of Methionine Synthesis in *Escherichia coli* by 2-Chloro-4-Aminobenzoic Acid and Sulfanilamide. Frede B. Strandskov 555
The Inactivation of the V Factor by Erythrocytes and the V-sparing Property of Nicotinamide. E. P. Casman 561
Penicillin Production by a Thermophilic Fungus. L. J. Rode, Jackson W. Foster, and V. T. Schuhardt 565
Studies on Streptomycin. I. Factors Influencing the Activity of Streptomycin. Sam Berkman, Richard J. Henry, and Riley D. Housewright 567
The Effect of *Streptococcus pyogenes* Extracts and Filtrates on Various Bacteria. Leo G. Nutini, Sr. Thomas Aquin Kelly, and Sr. Margaret Ann McDowell 575
The Relation of Protein Binding to the Pharmacology and Antibacterial Activity of Penicillins X, G, Dihydro F, and K. Ralph Tompsett, Selma Shultz, and Walsh McDermott 581
A Study of Sensitivity to *Hemophilus pertussis* in Laboratory Animals. I. The Hypersensitivity of Laboratory Animals to *Hemophilus pertussis*. I. A. Parfentjev, M. A. Goodline, and M. E. Virion 597

A Study of Sensitivity to *Hemophilus pertussis* in Laboratory Animals. II. *Hemophilus pertussis* Allergen and Its Assay on Laboratory Animals. I. A. Parfentjev, M. A. Goodline, and M. E. Virion 603
A Study of Sensitivity to *Hemophilus pertussis* in Laboratory Animals. III. The Formation of Antibodies and the Development of Sensitivity in Laboratory Animals Injected with *Hemophilus pertussis* Antigens. I. A. Parfentjev, M. A. Goodline, and M. E. Virion 613
The Use of Sodium Azide for Determining the Fermentative Ability of Yeast Developed Under Different Oxygen Tensions. M. C. Brockmann and T. J. B. Stier 621
Studies on Cellulose Fermentation. III. The Culture and Isolation of Cellulose-decomposing Bacteria from the Rumen of Cattle. R. E. Hungate 631
Spore Wall Demonstrated with the Electron Microscope. Charles A. Evans and Norman R. Underdahl 647
The Isolation and Distribution in Florida of an Anaerogenic Paracolon, Type 29911. Mildred M. Galton, Mary E. Hess, and Patricia Collins 649
The Isolation of a Strain of *Escherichia coli* Pathogenic for the Rabbit's Eye from a Patient with Diarrhea. Isaac Ruchman and Katharine Dodd 653
Cytochemical Mechanisms of Penicillin Action. I. Oxidation-Reduction Levels. Jean Dufrenoy and Robertson Pratt 657
Notes:
Paracolon Organisms in Spray-dried Whole Egg Powder. Mathilde Solowey 667
The Susceptibility of Crossbred Mice to Poliomyelitis Virus. D. Frank Holtman 668
Proceedings of Local Branches of the Society of American Bacteriologists 669

No. 6, JUNE, 1947

Gene Recombination in the Bacterium *Escherichia coli*. E. L. Tatum and Joshua Lederberg 673
Turbidimetric Evaluation of Bacterial Disruption by Sonic Energy. R. F. Shropshire 685
Two Antibiotics (Lavendulin and Actinorubin) Produced by Actinomyces. I. Isolation and Characteristics of the Organisms. Albert Kelner and Harry E. Morton 695
The Action of *Pasteurella pestis* Bacteriophage on Strains of *Pasteurella*, *Salmonella*, and *Shigella*. A. S. Lazarus and J. B. Gunnison 705
Lizards as Carriers of *Salmonella* and Paracolon Bacteria. W. R. Hinshaw and Ethel McNeil 715
The Preparation of Glycolytically Active Washed Cells of Lactobacilli. H. M. Tsuchiya and H. O. Halvorson 719
Adaptation in a Yeast Unable to Ferment Glucose. Folke K. Skoog and Carl C. Lindegren 729
The Effect of Large Amounts of Nicotinic Acid and Nicotinamide on Bacterial Growth. Stewart A. Koser and George J. Kasai 743
Hemophilic Gram-positive Rods. Magne Svendsen, Richard Amlie, and Sverre Dick Hendriksen 755
Chemical Detoxification of Flexner Dysentery Antigen. II. Studies of Accelerated Growth Rates. Frederick W. Barnes, Jr., and Marguerite Dewey 759
Two Antibiotics Produced by a Streptomyces. P. C. Trussell, C. O. Fulton, and Gordon A. Grant 769
Bacteriophage Under the Ordinary Microscope. Alvin W. Hofer 781
Glycerite of Hydrogen Peroxide. I. Comparison of Its Bacteriotoxic Action with That of Mercurial Solutions. Ethan Allan Brown, Wilfred Krabek, and Rita Skiffington 793
Proceedings of Local Branches of the Society of American Bacteriologists 801
Index of Authors 805
Index of Subjects 809
Contents iii
